

TT1000 Trolley Hoist

The TT1000 Trolley Hoist boasts a 1/2 ton load capacity, standard operator fence and the ability to hang over the roof by up to 5 ft, all of which keeps your crew's safety at the forefront without compromising speed.

The complete TT1000 system is tough and powerful for jobs requiring consistent raising and lowering of loads up to 1000 lbs. Self-locking pins make assembly quick and easy without special tools.

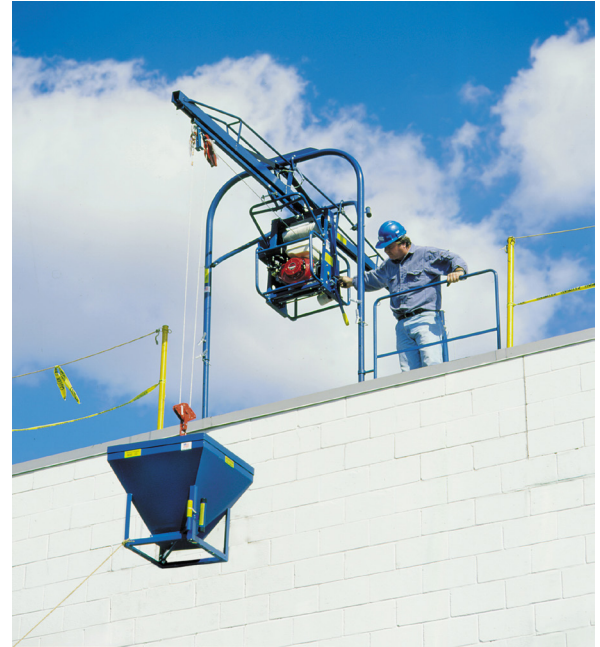

Powered by an 8 hp Honda gas engine, the hydraulic system provides precision controlled power up and

TT1000 Trolley Hoist Features & Benefits

- ▶ An operator fence and ballast weights are standard safety equipment. Nesting ballast weight shells are included.
- ▶ TT1000 trolley wheels are protected by heavy duty steel track.
- ▶ Adjustable leveling legs make this hoist ideal for working on sloped roofs and parapets.
- ▶ The TT1000 is easily transported in four sections and requires no special tools for assembly .
- ▶ Hoisting accessories are available including Gravel Buckets, a Hoist Fork and a Trash Tray .
- ▶ These labor-saving dependable systems are used by roofing, construction and HVAC contractors who want that competitive edge.
