

AES RAPTOR SKYNET

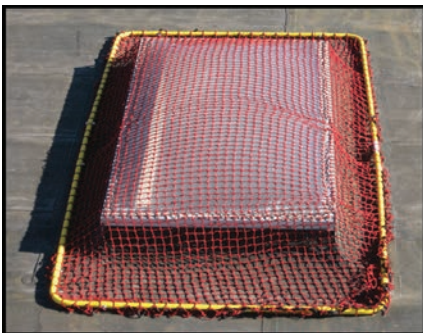

PANTHER EAST

AES Raptor SKYNET Temporary Skylight / Hole fall protection

Falls through skylights are the leading cause of death and a major cause of injuries on construction jobs. With an estimated cost of \$200 to cover each skylight, each time, protecting your workers can be expensive. SKYNET is an easy-to-use, re-usable, cost-effective solution for skylight fall protection. Simply lay a SKYNET over a curbed skylight, and you're protected from falling through to the level below. OSHA has issued standards, regulations and alerts notifying employers about the hazards of skylights and uncovered openings. Use a SKYNET on every skylight to meet OSHA regulations and requirements.
