

Husqvarna K 970

The new Husqvarna K 970 is our latest and most powerful handheld power cutter, featuring the revolutionary X-Torq® engine technology. It is a unique machine, in a class of its own when it comes to emission levels, efficiency and maneuverability.

LIGHT AND POWERFUL

A light, compact and powerful machine with superior power-to-weight ratio.

REDUCED WEAR

Reduced wear thanks to the drive belt with fully sealed transmission, which keeps out the cutting dust.

DURASTARTER™

Our virtually maintenance free starter, thanks to the dust-sealed starter and the durable starter cord.

WET CUTTING KIT

Less slurry and low water consumption thanks to the progressive water valve, this adjusts the water volume to the exact amount needed.

Features Husqvarna K 970

- The only time the filter needs to be checked and changed is if you experience lack of power.
- Provides better transmission of power, less frequent re-tensioning and extended service intervals.
- The drive belt with fully sealed transmission keeps out cutting dust for reduced wear and allows close cutting to walls and floor.
- Long service intervals
- Robust and reliable
- Easy to start
- Less slurry and low water consumption
- Low fuel consumption and emissions
- Ergonomic and easy cutting
- Easy to change blade guard position
- High power with less fuel
- Fits multiple blade bushings
- Blade retarder
- Our two-step filtration system with centrifugal cleaning and a single paper filter increases product life and extends service intervals.
- Our X-Torq® engine produces less emissions, has lower fuel consumption and results in more power.
- Patented, dust sealed starter unit with a sealed return spring and pulley bearing. DuraStarter™ also includes a starter cord with greatly increased durability. This makes the starter virtually maintenance free, further enhancing the reliability of our cutters.
- Our built-in automatic filter compensation maintains high power during the air filter life time.
- EasyStart ensures easier starting by reducing the compression in the cylinder.
- The cutting arm is reversible which lets you cut closer to walls or the ground. The drive belt has a fully sealed transmission. This keeps out cutting dust etc, reducing wear.
- Our anti-vibration system reduces vibrations in the cutter handles, so they are more comfortable to hold and can be used for longer periods. To provide the user a comfortable operating position and to reduce strain, the distance between the handles is large. The handles and the short engine body mean the user always stands close to the machine, for easier handling and control.
- Easy to start thanks to Air Purge and decompression valve.

TECHNICAL SPECIFICATION	
Engine	Air-cooled 2 stroke engine
Cylinder displacement	5.71 cu.inch
Power output	6.5 hp
Fuel tank volume	33.8 fl oz
Idling speed	2700 rpm
Vibrations front handle	3.9/3.4 m/s ²
Vibrations rear handle	4.2/4.8 m/s ²
Sound pressure level at operators ear	104 dB(A)
Sound power level, guaranteed (LWA)	115 dB(A)
Blade diameter	14/16 "
Max cutting depth	5/6 "
Combined bushing diameter	0.79/1 "
Weight (excl. cutting equipment)	24/26.2 lbs
Fuel tank volume	2.1 US pint
