

Husqvarna K 970 Ring

When you need to make deep cuts fast our K 970 Ring is the answer. It has an exceptional cutting depth of 10", twice the amount of a traditional power cutter. It has a high cutting capacity, can make deep cuts from one side and is the quickest method for small and medium-sized cuts, as no time is lost on installing rails.

ERGONOMIC AND EASY CUTTING

Efficient cutting with less strain on your body, thanks to its low weight, ergonomic handle and low vibrations.

HIGH POWER WITH LESS FUEL

Our built-in automatic filter compensation SmartCarb™ maintains high power and lowers fuel consumption.

LIGHT AND POWERFUL

A light, compact and powerful machine with superior power-to-weight ratio.

LONG SERVICE INTERVALS

A strong Poly-V belt combined with our maintenance-free DuraStarter™ and efficient filter-system Active Air Filtration™ ensure long service intervals.

Features Husqvarna K 970 Ring

- Low fuel consumption and emissions
- The only time the filter needs to be checked and changed is if you experience lack of power.
- Our virtually maintenance free starter, thanks to the dust-sealed starter and the durable starter cord.
- Provides better transmission of power, less frequent re-tensioning and extended service intervals.
- Thanks to the peripheral drive you can cut far deeper than with a traditional power cutter. The cutting depth of 10" is sufficient to cut through a normal wall from one side only.
- With the peripheral drive of the ring cutter, you can cut far deeper than with a traditional cutter with a center driven blade. On the ring cutter the cutting depth is not limited by a blade spindle.
- The water adjustment gives efficient dust management and makes operation easier and more efficient.
- Our X-Torq® engine produces less emissions, has lower fuel consumption and results in more power.
- Patented, dust sealed starter unit with a sealed return spring and pulley bearing. DuraStarter™ also includes a starter cord with greatly increased durability. This makes the starter virtually maintenance free, further enhancing the reliability of our cutters.
- Our built-in automatic filter compensation maintains high power during the air filter life time.
- EasyStart ensures easier starting by reducing the compression in the cylinder.
- Our anti-vibration system reduces vibrations in the cutter handles, so they are more comfortable to hold and can be used for longer periods. To provide the user a comfortable operating position and to reduce strain, the distance between the handles is large. The handles and the short engine body mean the user always stands close to the machine, for easier handling and control.

TECHNICAL SPECIFICATION

Engine	Air-cooled 2 stroke engine
Cylinder displacement	5.71 cu.inch
Power output	6.5 hp
Fuel tank volume	33.8 fl oz
Idling speed	2700 rpm
Vibrations front handle	3.8 m/s ²
Vibrations rear handle	5.1 m/s ²
Sound pressure level at operators ear	103 dB(A)
Sound power level, guaranteed (LWA)	116 dB(A)
Blade diameter	14 inch
Max cutting depth	10.6 inch
Weight (excl. cutting equipment)	30 lbs
Fuel tank volume	2.1 US pint
