

# AES RAPTOR RAPTOR ALERT™ PATENT PENDING

## Fall Warning System

The Raptor Alert Fall Warning System is the only product on the market that alerts other workers if a fall occurs on a job site. Often job sites are busy and noisy, which could cause a fall to go unnoticed for a prolonged period of time. Allowing an employee to suspend for more than 30 minutes can cause unconsciousness that can be followed by death. AES Raptor has designed a new innovative device that alerts workers to a fall by a piercing 130 decibel siren and an amber colored strobe light. This unit can be installed on all R1000 Mobile Fall Protection units currently in the market place or can be factory installed with the purchase of your new R1000 or TriRex.

- Easy to retrofit on existing units
- Rechargeable 12 volt battery
- Easy to test with your daily inspections
- Audible & visual warning
